

AWHONN Intermediate Fetal Monitoring

This course addresses principles of fetal heart monitoring and may be used as a knowledge assessment tool to validate the comprehension of experienced perinatal clinicians. This course includes lectures and hands-on skill stations, including performing Leopold maneuvers, placement of an intrauterine pressure catheter and Fetal spiral electrode, interpretation of Fetal monitoring tracings using case-based approach, identification of physiology based clinical interventions, and communication and risk management principles. This course can be used to support preparation for certification examinations.

Learning Outcomes:

- Interpret fetal heart rate monitoring using NICHD terminology within a safety culture framework of interdisciplinary teamwork
- Describe clinical interventions and related physiology to optimize fetal oxygenation
- Demonstrate collaborative communication in the perinatal setting.
- Demonstrate common Perinatal procedures related to fetal monitoring.

Nursing Contact Hours/CME Credit:

11.25 total contact hours/11.5 CME credit available through January 31, 2025 (.05 hours may be used towards pharmacology hours.)

Course Format:

Successful completion of online prerequisite education is required prior to attending the one-day-in-person portion of the course.

- prerequisite online learning approximately three hours.
